

Day 2 Internship Notes

Date: 02-06-2026

Work Start time

9:00am

Today's Objective

- Market direction.
- Chart analysis.
- Deepvue platform features.
- Technical analysis basics.

Topics learned Today

1. Learning Deepvue tutorials:

Today I focused on completing beginner-friendly Deepvue tutorials that help in understanding stock screening and market trend analysis.

a) Find Leading Themes:

Learned:

- How to identify sectors and themes leading the market
- Understanding market momentum
- Tracking strong-performing industries
- Identifying trending opportunities

b) Market Cycle Indicator:

Learned:

- Understanding different market phases
- Identifying bullish and bearish cycles
- How market timing affects trading decisions

2. Practicing stock chart analysis:

Today, I practiced analyzing two trending stocks:

- 1.HPE
- 2.DELL

These stocks were selected after observing strong market activity through X (Twitter) and Yahoo Finance.

1. HPE Chart Analysis:

Observations:

- Bullish momentum observed
- Strong upward movement
- Increased trading volume
- Breakout behavior visible

Analysis Performed:

- Trend
- Support
- Resistance
- Volume Analysis

2. DELL Chart Analysis:

Observations:

- Strong buying pressure observed
- Momentum continuation visible
- Positive market sentiment

Analysis Performed:

- Trend
- Support
- Resistance
- Volume Analysis
- Moving Average Observation

3. Technical Concepts Learned Today:

Today, I learned and practiced the following concepts:

- Trend Identification
- Breakout
- Support & Resistance
- Volume Analysis
- Moving Average Observation
-

Tools and Platforms Used

- Deepvue
- Yahoo Finance
- X (Twitter)

Videos/Resources Followed

1. Leading themes in Deepvue
(https://youtu.be/bSMuB_Uw6Jc?si=kqQrFPT_yH72MKkd)
2. Market cycle indicator in Deepvue
(<https://youtu.be/qvACA7x8ILw?si=PC2UTh49Xg1Kjr87>)

Questions I Had

1. How to Identify Whether a Stock is Bullish or Bearish?
2. Why is Volume Important During a Breakout?
3. How Do Support and Resistance Help Traders?

Answers

- A stock is considered bullish when it forms: Higher Highs, Higher Lows.
A stock is considered bearish when it forms: Lower Highs, Lower Lows.
Trend structure helps traders understand market direction and momentum.
- Volume confirms the strength of a breakout.
If price breaks resistance with high volume, it indicates strong buying participation and increases the reliability of the move.
Low-volume breakouts are weaker and may fail.
- Support and resistance help traders identify:
Possible entry points, Exit zones, Reversal areas, Breakout levels.
Support acts like a floor where price may bounce upward, while resistance acts like a ceiling where price may face selling pressure.

Key Takeaways From Day 1:

- Learned how to identify bullish and bearish trends using chart structure.
- Understood the importance of volume, support, and resistance in trading.
- Practiced real-time chart analysis on HPE and DELL stocks.
- Completed Deepvue tutorials related to market themes, screeners, and market cycles.
- Improved understanding of technical analysis and market observation skills.

Today was mainly focused on understanding market trends, learning how to identify bullish and bearish chart movements, and practicing technical analysis on HPE and DELL stocks. I also explored important Deepvue tutorials related to leading market themes, stock screeners, and market cycle indicators. Through chart practice, I learned concepts like trend, breakout, pullback, support & resistance, volume analysis, and moving averages. Additionally, I improved my understanding of how traders analysis momentum stocks using real-time market data and technical indicators.
